Meeting Location: Hotel del Coronado

1500 Orange Avenue, Coronado, California 92118
(800) 468-3533 or (619) 522-8000

July is an ideal time of year to visit the Hotel del Coronado, located on the tranquil island of Coronado just south of beautiful San Diego. Add your name to its legendary register that lists those of presidents, royalty, movie stars and moguls. With eight restaurants and lounges, tennis courts, an 18-round golf course, a boathouse, and pools and spas, the "Del" is renowned for its elegance and service.

A block of rooms has been reserved at a special rate of \$309 per night (single or double room occupancy) plus portage and maid service fees, and 8% city room tax. There is also a daily resort charge of \$25 per room per night which includes high speed internet access, daily newspaper delivery (Mon.-Sat.), in-room coffee and tea, complimentary fitness center access, and more. Porterage & maid service charge \$7.50/night. Identify yourself as attending the EMCME emergency medicine educational conference to obtain this rate. Reservations received after the block is sold out or after June 8, 2010, will be subject to availability, and the special conference discount will not apply. The conference does not accept responsibility for room availability.

SATURDAY, JULY 10 (7:45 am - 1:15 pm)

- **Minimizing Litigation Risks** – Medical-legal pitfalls based on actual cases
- **Avoiding Harmful ED Practices** – Potentially dangerous drugs and their interactions, diagnostic miscues, and more
- **Common Radiology Misses** – Missed fractures & dislocations, pediatric vs. adult injuries, effective stabilization
- **Injection Techniques in the ED** – Management of bursitis, tendinitis, myofascial pain syndromes, and other conditions
- **What's Happening in this Joint?** – Arthrocentesis interpretation, patterns, and treatment options
- **How to Avoid Contrast Materials** – The latest recommendations and contraindications
- **Atypical Chest Pain** – Tests to expedite and improve workup of chest pain patients
- **You've Got A Lot of Nerve** – Techniques and indications for nerve blocks at the wrist, mouth, and ankle
- **Tricks & Gadgets in the ED** – How to facilitate patient care while saving time and money.

HANDS-ON ULTRASOUND

(1:30 - 5 pm) Separate registration required

SUNDAY, JULY 11 (7:45 am - 1:15 pm)

- **ACLS** – Recommendations for chest compressions, pulse checks, and initiation of hypothermia
- **High-Risk Syncope** – Identify high-risk subsets of patients, plus selective treatment strategies
- **Kidney Stones** – The role of CT scans in diagnosis and therapies interventions
- **Real & "Enhanced" Pain** – How to accurately measure and optimally treat acute and sub-acute painful conditions, spot & deal with drug seekers.
- **Intubation in 2010** – Advances in the art of difficult airway management
- **Bell's Palsy & Shingles** – The role of steroids and antivirals for Bell's palsy, and vaccination indications for shingles
- **Head Trauma** – Initial therapeutic interventions and the latest guidelines for traumatic brain injury (TBI)
- **Cutting-Edge Ultrasound** – Techniques and applications you can use on your next shift
- **Pediatric Respiratory Cases** – A visual case study on how to recognize, diagnose, and rapidly treat these critical cases

Atkinson**

Conference
Coordinators:
**Susi Morissett,
Rene Retana**

**23rd Annual EMCME
National Conference on
Advances in Emergency Medicine**

**Presented by the
Olive View-UCLA Department of Emergency Medicine Faculty**

This is the premier Infectious Disease course for Emergency specialists, and also features days on Acute Medicine, our popular LLSA and EKG reviews, plus new hands-on ultrasound and simulation sessions. As a legacy EM conference successful for 23 years, we have taught thousands of Emergency Medicine providers from all across the U.S. Upon completion of this course, the healthcare provider will have a greater understanding of the emergency conditions discussed, and will be able to provide the appropriate management.

New Saturday Afternoon Feature:

Getting a Grip on Ultrasound: Basic Echocardiogram, FAST Exam and Vascular Access Techniques

This hands-on, three-hour session will cover basic echocardiogram, FAST exam and vascular access techniques. This course is great for the novice sonographer or the provider who wants a refresher on optimizing image acquisition. Show up to your next shift with the skills to use your dormant ultrasound machine with confidence.

**Sign up today for our
MEGA LLSA 2008, 2009, 2010
Review Course!**

Thursday, July 8th, 8 am - 5 pm

- All required articles for each year
- “Take-Home Points”
- One-page review of each article
- 9 hours CME credit
- Interactive, fun, relaxed review

**Tuition: \$275 per year
(includes breakfast & lunch)**
